

TAKE PART IN THE PROJECT: „ARTLAB: FUTURE!“

As a student, how do you live with the current situation since the COVID 19 pandemic? How do you develop a perspective for the future under the current conditions? How can media support young people in their role as reporters during the pandemic?

Planned are:

- 1. From 11th to 12th March 2022: A creative workshop on two days.** You are invited to use the studio to express your impressions during the pandemic and the impact it had and still has on your life. In the „ArtLab“ you will work in an artistic way with analogue and digital media: painting, drawing on paper or creating images on a tablet. Future perspectives will evolve from the created images.
- 2. The 5th May 2022: A panel discussion** with students, politicians and journalists/media representatives. The media part during the pandemic will be discussed and the following questions will be focused:
 - How did you experience the media reportings of the pandemic? What is important for you in communicating in (social) media?
 - How can journalism contribute to your well-being and health even in difficult times?
- 3. An exhibition ... about the project „ArtLab: Future!“.**
The dates of the exhibition will be announced soon.
