

Implementing a drug checking service in a (very) small country – one year later.

Katia Duscherer & Carlos Paulos, CePT, Luxembourg

Party MAG-Net is an established health promotion and harm reduction project in the Luxembourgish party scene. In April 2014, we launched a new service named DUCK, providing recreational drug users with the opportunity to analyse their products.

DUCK is a joint project of the National Addiction Prevention Centre (CePT), the National Health Laboratory (LNS), with the support of the Ministry of Health and the General Prosecutor's Office.

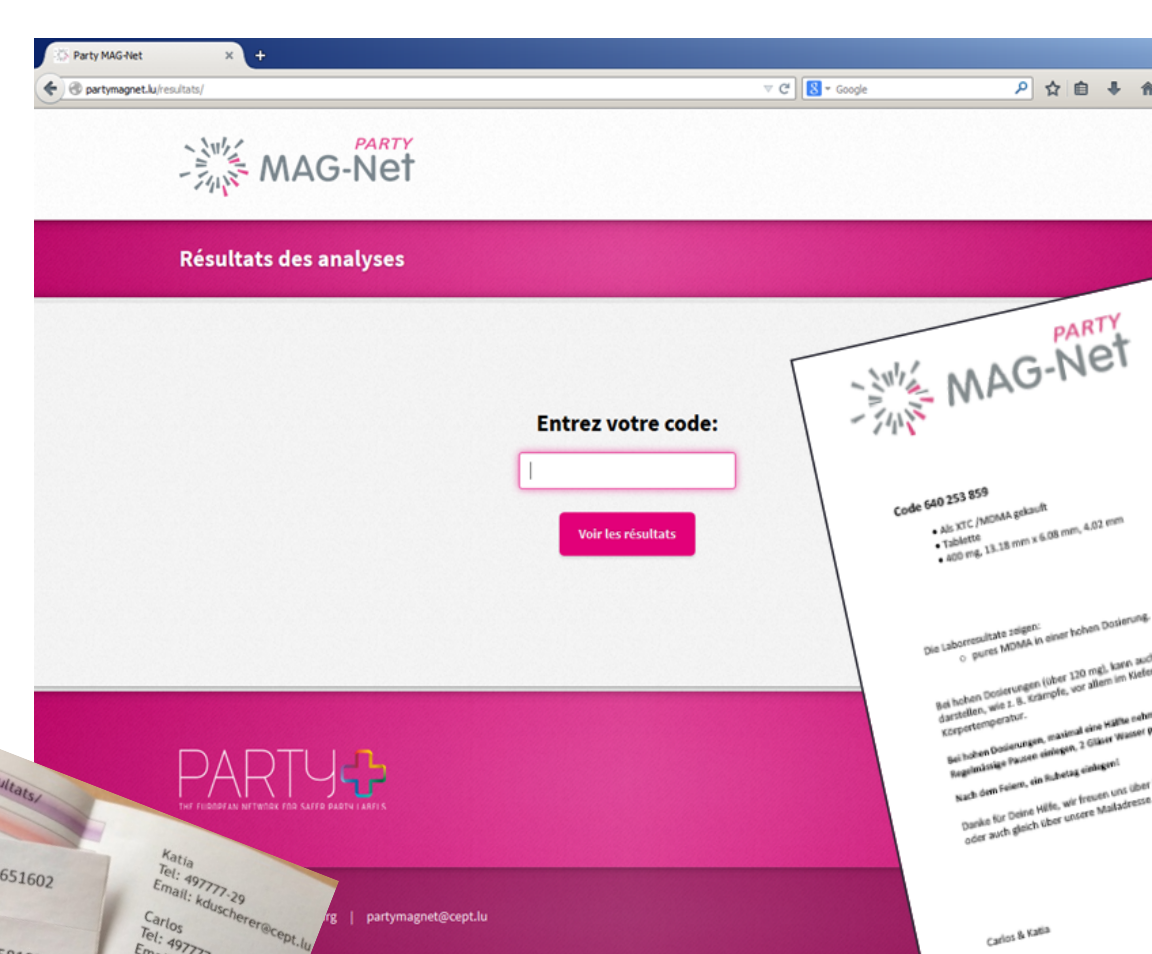

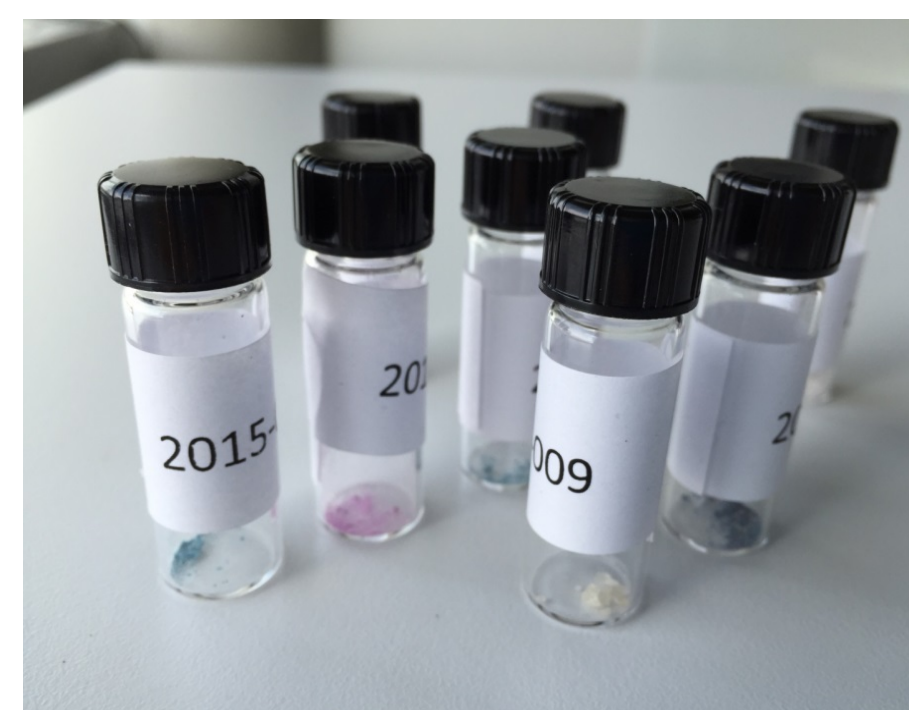

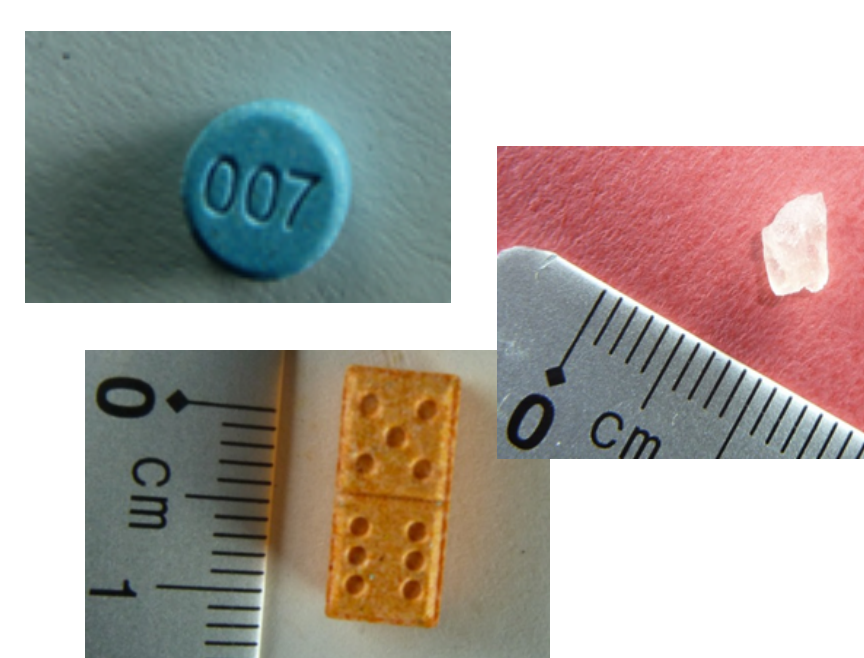

Procedure

Collection of drug traces at the party location

Transport to the toxicology lab of the LNS

GC-MS Analysis

Feedback

Anonymous feedback to the consumer via partymagnet.lu

Data report sent to the project partners and the focal point of the OEDT

13 months
14 events
92 samples with
20 unexpected
results

Quality

MDMA: high
Cocaine: stable
Speed: aleatory
